# FUNERAL SERVICE

## We say every funeral service should be a 'Celebration of a Life' that has been lived.

Arranging a funeral is not easy; in fact, it is difficult and can be stressful for families. We will make life much easier and less stressful for your family.

Below is an example of what happens when a celebrant meets a family. Imagine you're sitting in on your funeral family visit; the Celebrant is taking notes. You haven't left funeral instructions, and your family don't know what you want for your funeral service.

When it comes to writing up your Eulogy, there are many gaps are missing. Family don't know what your life was like as a child - a teenager or even early married life.

They don't know how you both met - where you went on dates or how you proposed (did you go down on one knee). Stories of your wedding day and honeymoon - missing. Those funny stories of life before the children came along, then early family life and the beautiful memories you have in your head right now, all will be gone.

Loved ones become distressed and upset, your eulogy and funeral service is sadly incomplete, and over 30% of your life missing.

## Elements of your life lost forever - loved ones will never know the full story of 'you'
